

HUNTINGDON COUNTY EMBRACES THE FUTURE OF PUBLIC SAFETY IN ONE PLATFORM

Huntingdon County, Pennsylvania – Sheriff's Office

OVERVIEW

Sheriff Jeff Leonard has relied on Teleosoft's CountySuite™ for nearly a decade, since taking office. Now, with Teleosoft's acquisition by ARMS, and firsthand experience implementing ARMS RMS and working with the team behind it, Sheriff Leonard could not be more excited about what the future holds for public safety. He envisions one platform, on the cloud, serving every need his office has, from records management to financial reporting to jail management, delivered by a team he trusts. It's a future he's ready for, and one he's encouraging other Sheriffs to pay attention to.

BENEFITS

01

A System That Fits the Job

ARMS built its RMS around Huntingdon County's daily operations, from criminal complaints and traffic citations to dropdown menus for local townships and patrol areas.

02

Cloud Access in the Field

Deputies complete reports from the patrol car, a cell phone, or home, all cloud-based and CJIS compliant.

03

Time Back for the Team

Hours of handwritten mileage logs and manual reconciliation now take minutes, giving deputies and staff time back for the work that matters.

04

A Team That Shows Up

From commissioners' meetings to hands-on training ahead of go-live, both ARMS and Teleosoft have supported Huntingdon County with attention Sheriff Leonard calls rare in this industry.

BUILT AROUND THE WAY WE WORK

"ARMS built the system around how my office actually works, from criminal complaints to traffic citations to the specific roads and boat launches we patrol every day. It's cloud-based, it's CJIS compliant, and the cost made sense for a county our size."

— Sheriff Jeff Leonard, Huntingdon County, PA

ONE PLATFORM. ONE FUTURE.

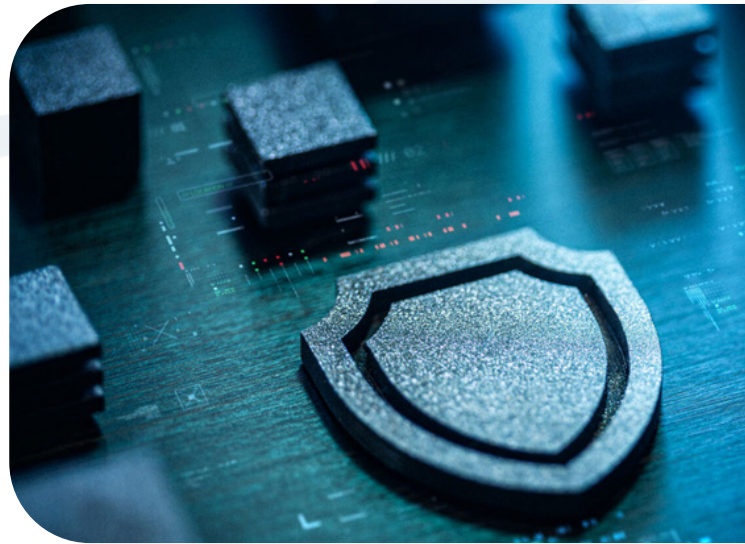

"I like what Teleosoft has, and I like what ARMS has. Put the two together, and it's going to be awesome. One system, on the cloud, covering it all: that's the future, and it's a no-brainer to me."

— Sheriff Jeff Leonard, Huntingdon County, PA

RESULTS

- Simplified month-end financial reconciliation for office staff to a single click
- Significantly reduced office paperwork and man-hours through streamlined workflows and reporting
- Positioned the county for one connected public safety platform as ARMS and Teleosoft bring RMS, jail management, and courts capabilities together

BUILDING PUBLIC TRUST.

For Sheriff Leonard, the message to other Sheriffs is simple: sit down and listen to what ARMS and Teleosoft can offer together. These are companies that show up and listen, not vendors chasing a sale. As the two come together on one platform, Huntingdon County is ready for what's next.
